SKILLSWAP – TEST CLOSURE REPORT

1. Project Information

Item	Details
Project Name	SkillSwap
Testing Type	Manual Testing
Prepared By	Thirisha G
Application Type	Web Application
Browser	Google Chrome
Operating System	Windows 11

2. Testing Objective

The objective of testing was to verify that the SkillSwap application functions as expected and meets the defined functional requirements.

Testing focused on validating the major user-facing features, checking expected user workflows, and identifying defects in the application.

3. Testing Completion

All planned testing activities have been completed.

The following activities were completed:

- Test Plan
- Test Scenarios
- Test Cases
- Requirement Traceability Matrix (RTM)
- Test Execution
- Defect Reporting
- Test Summary Report

4. Test Execution Result

Metric	Result
Total Test Cases	210
Test Cases Executed	210
Passed	208
Failed	2

Blocked	0
Not Executed	0
Execution Percentage	100%
Pass Percentage	99.05%
Fail Percentage	0.95%
Defects Identified	2

5. Modules Tested

The following modules were covered during manual testing:

- Registration
- Login
- Home
- Explore Skills
- Dashboard
- Profile
- Skill Management
- Request Management
- Sessions
- Chat
- Notifications
- Logout

6. Defect Status

A total of 2 defects were identified during test execution in the Chat module.

Defect ID	**Defect Description**	**Severity**	**Status**
DEF-001	New message notification is not displayed to the receiver when a message is received.	Medium	Open
DEF-002	Unread message indicator is not displayed for newly received messages.	Medium	Open

Out of 210 test cases, 208 passed and 2 failed due to the identified Chat module defects.

Both defects have been documented in the Defect Report for further correction.

7. Closure Criteria

The testing process is considered complete because:

- All planned test cases were executed.
- Test execution results were documented.
- Identified defects were recorded in the Defect Report.
- RTM was completed.
- Test Summary Report was prepared.
- All planned testing activities were completed.
- Remaining open defects were documented and communicated for future resolution.

8. Enhancement Recommendations

The following enhancements can be considered in future releases to further improve the application's usability and user experience:

- Provide additional search and filtering options in the Explore section.
- Add profile picture support for users.
- Provide reminders for upcoming scheduled sessions.
- Improve responsive design for mobile and tablet devices.
- Provide additional session management options, such as rescheduling or cancelling a scheduled session.
- Add more detailed user profile information to help users select suitable skill partners.

These recommendations are future enhancements and are not considered defects in the current version.

9. Final Conclusion

The SkillSwap application has completed the planned manual testing activities.

A total of 210 test cases were executed, out of which 208 passed and 2 failed. The two failed test cases are related to missing new message notifications and unread message indicators in the Chat module.

Both defects have been documented with Medium severity and remain Open for further correction.

The application achieved a 99.05% pass percentage within the tested scope. The identified defects should be addressed in a future build, and the suggested enhancements can also be considered for improving the application's usability.

Based on the completed testing activities and documented results, the testing process is considered closed.

Final Test Status: PASS WITH DEFECTS

Testing Status: CLOSED
